EDUCATION

University of the National Education Commission, Krakow **Oct 2024 - Present**
• Program: Computer Science (Bachelor's Degree)

PROFESSIONAL EXPERIENCE

Founder & Freelance Full Stack Engineer, Self-Employed **Dec 2025 - Present**
• SaaS & Custom Solutions: Developed and scaled AI-driven products ([DevLucid](#), [SeshTab](#)) and bespoke full-stack applications tailored to client needs.
• Tech Architecture: Architected secure, high-performance systems using Next.js, TypeScript, and Supabase, with Vercel deployment.
• Product Management: Managed the end-to-end software lifecycle from initial concept to deployment and analytics-driven iterations.

IT Support, Electrolux Poland **Jun 2025 - Dec 2025**
• Data & Operations: Analyzed IT and business data using Excel, R and Python while coordinating testing and compliance validation.
• Workflow Automation: Developed and maintained automation scripts to optimize data structures and streamline team workflows.
• Cloud & Collaboration: Supported cloud solution implementations while working effectively within a remote, international team.

Customer Support & Website Administrator, ENYO **Apr 2022 - Jun 2025**
• Provided comprehensive customer support and resolved client issues.
• Developed and administered the company website, ensuring its functionality and updating content.

E-commerce Business, Self-employed **Mar 2020 - Jun 2025**
• Managed an independent business importing goods from China and selling via Shopify and marketplaces.
• Built and managed Shopify stores for clients, providing consulting on product sourcing and logistics.

Jr. Customer Support Engineer, PolicyFly **Aug 2024 - Sep 2024**
• Engineered and maintained dynamic document templates utilizing docxtemplater syntax, ensuring accurate and customized client configurations.
• Acted as a technical bridge between clients and the engineering team, accelerating the resolution of complex system issues and optimizing user workflows.
